

RESEARCH INTERESTS

Scientific Machine Learning, AI for Science, Computational Fluid Dynamics

EDUCATION

Cornell University Ithaca, NY
Incoming Ph.D. Student in Mechanical Engineering Starting 2026

Shanghai Jiao Tong University Shanghai, China
B.Eng. in Energy and Power Engineering, B.S. in Applied Mathematics 2022–2026

- Thesis Focus: Automated Simulation and Analysis of Hemodynamics in Pulmonary Arteries for Tetralogy of Fallot

SELECTED EXPERIENCE

University of Notre Dame South Bend, IN
Visiting Research Assistant 2025

- Developed an automated SciML framework for aortic graft optimization using OpenFOAM and surrogate neural networks.

University of Texas at Dallas (Remote)
Research Assistant 2025–2026

- Applied probabilistic modeling and regression analysis to investigate decision-making mechanisms of LLMs under uncertainties.

Shanghai Jiao Tong University Shanghai, China
Project Lead, Shanghai Undergraduate Innovation Program 2023–2024

- Led a team in research on foundation models for autonomous navigation in Habitat simulator.

SELECTED SCHOLARSHIPS AND AWARDS

- **Cornell Fellowship**, Cornell University 2026
- **First Class Scholarship for Undergraduate Overseas Research**, SJTU 2025
- **Undergraduate Excellence Scholarship**, SJTU 2025

SKILLS

- **Programming & AI:** Python (PyTorch), C/C++, MATLAB, R
- **Engineering Simulation:** OpenFOAM, Ansys, SimVascular, SolidWorks
- **Research Tools:** Git, Docker, L^AT_EX, ParaView
