

RESEARCH INTERESTS

Scientific Machine Learning, AI for Science, Computational Fluid Dynamics

EDUCATION

- Cornell University**
Ph.D. Student in Mechanical Engineering, Advised by Dr. Jian-Xun Wang

Ithaca, NY
Starting 2026
- Shanghai Jiao Tong University**
B.Eng. in Energy and Power Engineering, B.S. in Applied Mathematics

Shanghai, China
2022–2026
- Thesis: Automated Numerical Simulation of Hemodynamics in Pulmonary Arteries for Tetralogy of Fallot

SELECTED EXPERIENCE

- University of Notre Dame**
Visiting Research Assistant

South Bend, IN
2025
- Developed an automated SciML framework for aortic graft optimization using OpenFOAM and surrogate neural networks.
- University of Texas at Dallas**
Research Assistant

(Remote)
2025–2026
- Applied probabilistic modeling and regression analysis to investigate decision-making mechanisms of LLMs under uncertainties.
- Shanghai Jiao Tong University**
Project Lead, Shanghai Undergraduate Innovation Program

Shanghai, China
2023–2024
- Led a team in research on foundation models for autonomous navigation in Habitat simulator.

SELECTED SCHOLARSHIPS AND AWARDS

- **Cornell Fellowship**, Cornell University 2026
- **First Class Scholarship for Undergraduate Overseas Research**, SJTU 2025
- **Undergraduate Excellence Scholarship**, SJTU 2025

SKILLS

- **Programming & AI:** Python (PyTorch), C/C++, MATLAB, R
- **Engineering Simulation:** OpenFOAM, Ansys, SimVascular, SolidWorks
- **Research Tools:** Git, Docker, L^AT_EX, ParaView
